

Global Opportunities Portfolio

Multi-Asset F (GBP) Factsheet

As at 31 Aug 2020

INNOVATIVE HIGHLY DIVERSIFIED COST EFFICIENT RISK TARGETED PROVEN INVESTMENT EXPERTISE

The Parallel Core Growth portfolio range consists of five highly diversified multi-asset class portfolios designed to meet a range of client investment objectives.

The range is fully diversified across: Asset Class, Geography, Currency and Factor. The portfolios carefully blends a mix of five broad asset classes: Equities, Fixed income, Alternatives, Diversifying Assets and Cash.

The portfolios combine two complimentary investment styles accessed through our Dynamic and Efficient Strategies. These two distinct approaches have been specifically designed and built by Pacific to work in conjunction with each other.

Overview

Investment objective

The investment objective of the Parallel Global Opportunities Portfolio is to achieve capital growth over the medium to long term (5-10 years). The Portfolio offers exposure to a range of collective investments providing diversity across regions and sectors, with a significant bias towards equity holdings which could account for 100%. In seeking to maximise returns the Portfolio may also include exposure to some specialist or thematic collective investments which can display heightened volatility, and so investors should ensure that they understand the risks involved.
